

SALVAGE SENSOR RECOVERY PROGRAM

Reduce unnecessary waste and earn cash.

In a commitment to the environment, NTK rewards a \$15 gift card for every 30 used oxygen sensors received (regardless of brand). Oxygen sensors are then sent to a facility where they are responsibly recycled and saved from the landfill. SSRP is a profitable way for technicians to recycle used or failed oxygen sensors.

How it works:

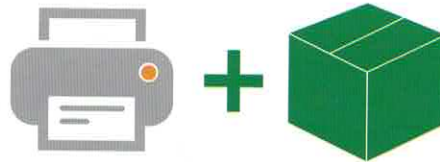

STEP 1
Register on ntkssrp.com

STEP 2
Receive a welcome packet including: an NTK Oxygen Sensors catalog, brochure, stickers, plus 5 pre-paid packing slips and UPS labels.

STEP 3
Collect 30 used oxygen sensors, regardless of brand. Remove and discard wiring harnesses.

STEP 4
Print out a prepaid packing slip from SSRP website and attach to packaged 30 sensors. Mail to NGK.

STEP 5
NGK receives and verifies your sensor return.

STEP 6
A \$15 gift card is sent for every package of 30 oxygen sensors.

Disclaimer: Salvaged sensors can only be processed in increments of 30. This program applies to technicians only. SSRP is not available to distribution centers, jobbers, retail outlets, recyclers or scrap yards. Oxygen sensors may include but are not limited to NTK Oxygen Sensors, and are not redeemable for cash value. Gift card type is subject to change without notice.
